OF HEALTH

Vol. Second, commencing Jan. '73.

THE SCIENCE of HEALTH baying been till more fully to the popular transfer of the Hy-cienic System. We shall publish— POPULAR PHYSIOLOGY, fully illustrated AFFECTIONS OF THE EVE AND EAR, ALL MEDICAL SYSTEMS, giving a hisalled in all ages of the world, DOMESTIC ECONOMY, Household Affairs

Hygienie Csoking, the Secretion and Jones Fond, etc., THE ECONOMY OF HEALTH. Only those who have investigated the subject can be aware of the crosmous waste caused by sickness and unhygienic living. By adopting the Hygienie system, the people of the United States would save annually more than one thousand millions of dollars. Does this statement seem extravagant? Statistics more than nent seem extravagant? Statistics more than ustify it, as we shall prove. THE LAROR PROBLEM.— Correct habits of living will ensure the laborer Health an Strength, enable him to accumulate his earn ings, and become pecuniarily independent. HEALTH IS HAPPINESS.—Above all mon

his journey, and a little care taken in exami-nation of rontes will in many cases save much trouble, time and money.

The "C., B. & Q. R. R." running from Chica-go, through Galesburg to Burlington, and the "L., B. & W. Route," running from Indianap-olis through Bloomington to Burlington, have achieved a splendld reputation in the two years as the leading passenger routes to the West. At Burlington they connect with the B. & M. R. R. and form the great Burlington Howa to Nebraska and Kansas, and with close connections to California and the Territories. Passengers starting from Holmes county on their way westward, cannot do better than to take the Burlington Route. This line has pub-lished a pamphlet called "How to Go West," which contains much valuable information; a large correct map of the Great West, which can be obtained free of charge by addressing the General Fassenger Agent, B., & M. R. R., Burlington, lowa. Iron Fences, Plows, &c.. &c. Farmers and Mechanics.

AMERICAN

SEWIN

And Most Perfect Machine Made in th World.

ALSO, A SEWING MACHINE,

Button-Holes and Do Over-seaming, THE SEWING MACHINE,

Like all machines, when first made, and the did the work for which they were intended, was rude, uncouth and imperfect, but the in-ventive genins of man, stimulated by protection, has not only improved them, but the last having the advantage of the defects and imperfections of the first, have devised and orig inated new ones, that are altogether better, more implified, neater and chesper, so that we can ent to you a machine that, at a glance, you would pronounce perfect. At all events the will do work superior to hand work, either fo

American Sewing Machine, count of their mechanical construction, not being complicated, or both, seldom or nev out of order, and will last a lifetime.

The Splendid Mechanism The Splendid Mechanism

Of this machine, and the superior skill, workmanship and materials employed in its construction, are a guaranty of accuracy, strength
and durability, and runs with such case that it
makes a woman laugh.

The shuttle, riding in its carrier, is subject
to no wear, and the friction of a "raco" is
avoided. The tensions admit of such nice adjustment, and with such case and certainty,
that one of the great difficulties met with in
ordinary machines is entirely avoided. The
feed is adjustable, so that it will work with
equal facility either light or heavy goods.
